Mr. Paul Stacey or whom it may concern,

In this country farms are failing to economic hard times and ridiculous laws like this. My well will never be able to keep up the demand of my farm needs. I use water management system now (Aquaponics) to reduce my water needed to farm.

We need to ensure exceptions for farming is included in this bill. If the local farms can't stay a float, our food will come from overseas. We will be fighting a war in a few years from now for food instead of oil.
